

ROBERTET

# Accord™ FLAVOURS

Robertet is proud to introduce a complete new line of functional flavours : the Accord™ flavours. Like the sensation flavours, the Accord™ flavours have been designed to provide you with a toolbox to create or enhance a specific character in an existing flavour. Your strawberry yoghurt should be greener, your orange soft-drink is not juicy enough, your vanilla lacks bean character, everything can be easily fixed now with the Accord™ range. You do not have to be a flavourist to use these versatile flavours. The green Accord™ will enhance the green notes of a strawberry, an apple or a tomato. Using a single raspberry flavour, you will be able to make it green, ripe, jammy, seedy,... Anything you want can be achieved. These flavours are cost-effective and available in liquid or dry form, natural or nature-identical.
